

scrrr.

Your everyday writing app becomes screenwriting software

The software is live in Google Docs.
Word is the next integration.

Hugo Thomas, September 10, 2026

Final Draft makes you switch editors. We make that step obsolete.

Google Docs becomes your screenwriting software.

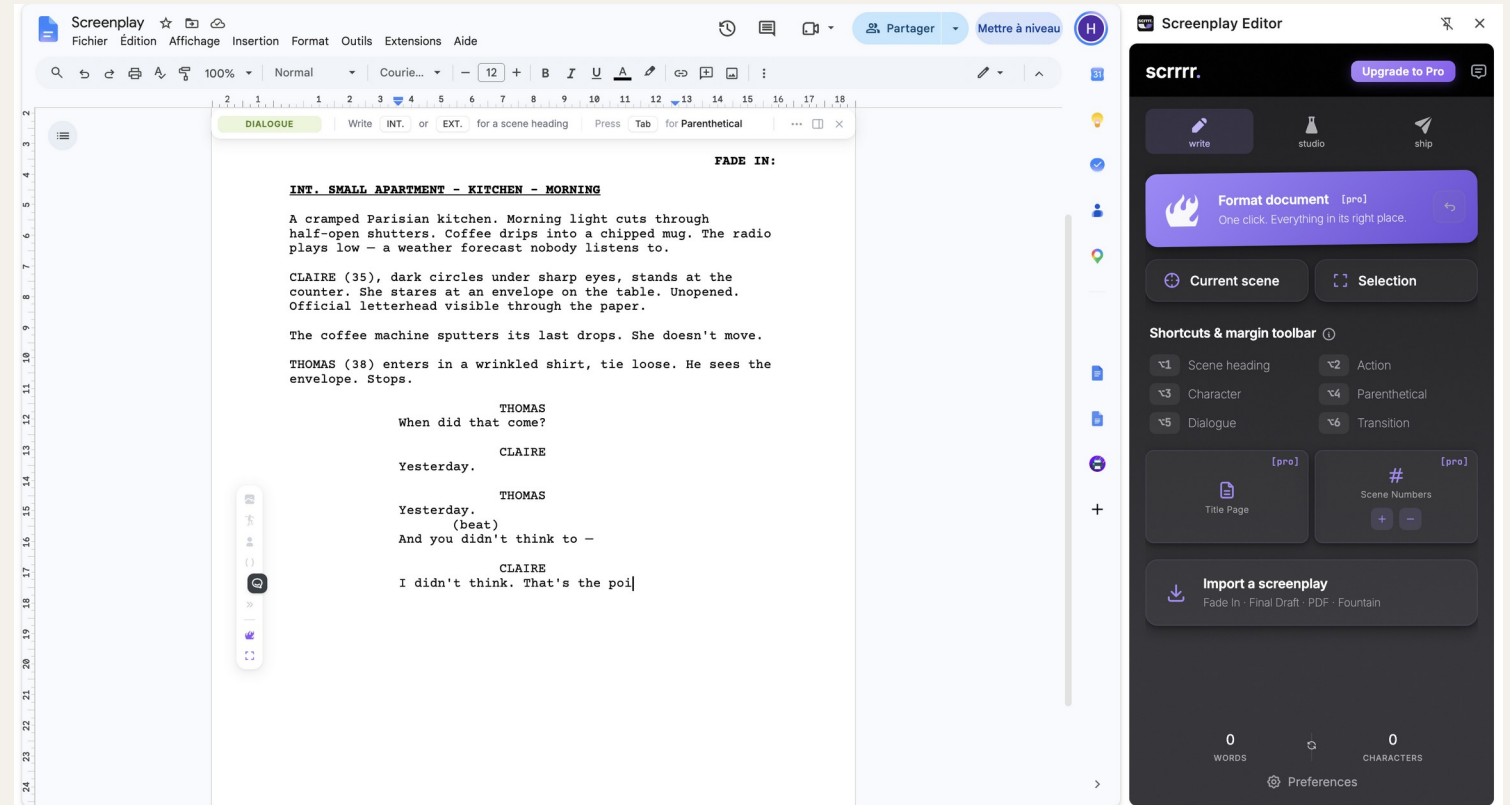

You rearrange scenes
on a scene board.

You rewrite it together.

Your co-writers comment
and suggest revisions
in the same Google Doc.

You export to Final Draft or PDF.

[See the software in action](#)

Why recreate Google Docs when you can write inside it?

Final Draft 13 desktop

Start a session, share its code, then have the host approve each participant.

3GK-NKZM-RB6

Example Session ID published for Final Draft 11.

Arc Studio

“Real-time collaboration, like Google Docs.”

With scrrrr, you are in Google Docs.

Share the document.

Your co-writers write and comment in the same place.

Final Draft also offers a separate Cloud product. Sources and scope in the notes.

We have paying customers worldwide

14,000+

cumulative installs

Act 1	Act 2A	Act 2B	Act 3
Robby prépare son rendez-vous Robby se prépare maladroitement à un rendez-vous.	Kamel rêve d'une grosse affaire Kamel confie à Anne son désir de percer grâce à une grosse arrestation.	Dino sur le terrain Dino et sa bande traînent sur le terrain de foot, Diego sur le banc.	Anne arrête Robby Anne surprend Robby en combinaison.
Robby se rend au restaurant Robby part à pied vers son rendez-vous en écoutant de la musique.	Robby cherche Dino Robby se gare précipitamment devant l'immeuble de Chris pour trouver Dino.	Plan pour confronter le proviseur Robby, Ophélie et Dino arrivent à l'école pour une confrontation avec le proviseur.	Chris frappe Robby Robby et Chris découvrent Clément-Parnas attaché dans la piscine.
Appel de Chris interrompt Robby Robby attend au restaurant quand Chris l'appelle pour une question urgente.	Chris vétérinaire refuse Chris explique à une cliente qu'elle ne peut pas piquer un chien juste parce qu'il boude.	Robby achète du matériel Robby se rue au magasin de bricolage pour acheter de l'anti-tag et des combinaisons.	Robby rentre avec Thelma Robby rentre à la maison avec un McDo.
Robby et Ophélie au luna park Robby et Ophélie jouent ensemble au luna park.	Robby parle avec Thelma Robby entre dans la chambre de sa fille Thelma qui fait ses devoirs.	André surprend Robby André surprend Robby au moment où il essaie de voler le Karcher du garage.	Robby est arrêté Robby donne ses clés à Chris avant d'être menotté par Anne.

We are building Grammarly for screenwriters

We add specialist software to tools writers already use.

Google Docs

The software already works in Google Docs.

Word

We are preparing the next integration.

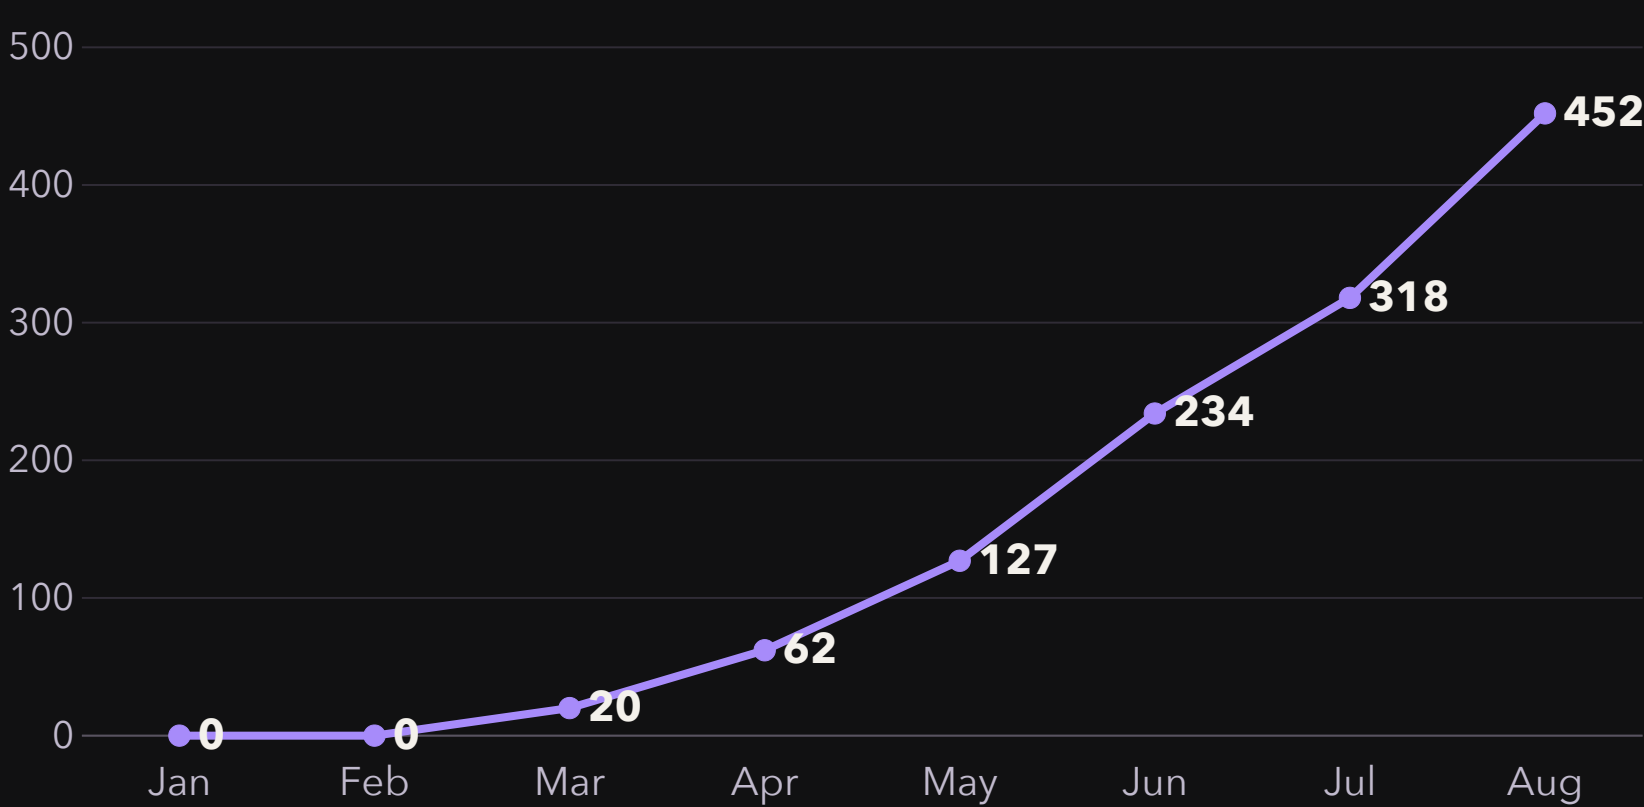

Arabic version

Claude Saliba leads our Arabic-language launch.

MRR more than tripled from May to August

Monetization rolled out progressively. Individual subscriptions only, excluding schools.

Monthly recurring revenue in 2026, EUR

September 9, 2026

€483

in monthly recurring
revenue

88

active subscriptions
on September 5

**Our first
schools have
agreed to buy
licenses**

\$1,449

Two annual agreements
represent this expected
revenue.

SINGAPORE, LAKESIDE

Canadian International School

The school has accepted the quote.
The license covers up to 100 students and 3 teachers.

\$1,200

per school year

CALIFORNIA

JDS Creative Academy

The school has agreed to the license.
It covers up to 20 students and their teacher.

\$249

per year

FRANCE

BTS Audiovisuel de Noisy-le-Grand

Discussions are underway.

One license covers the whole class

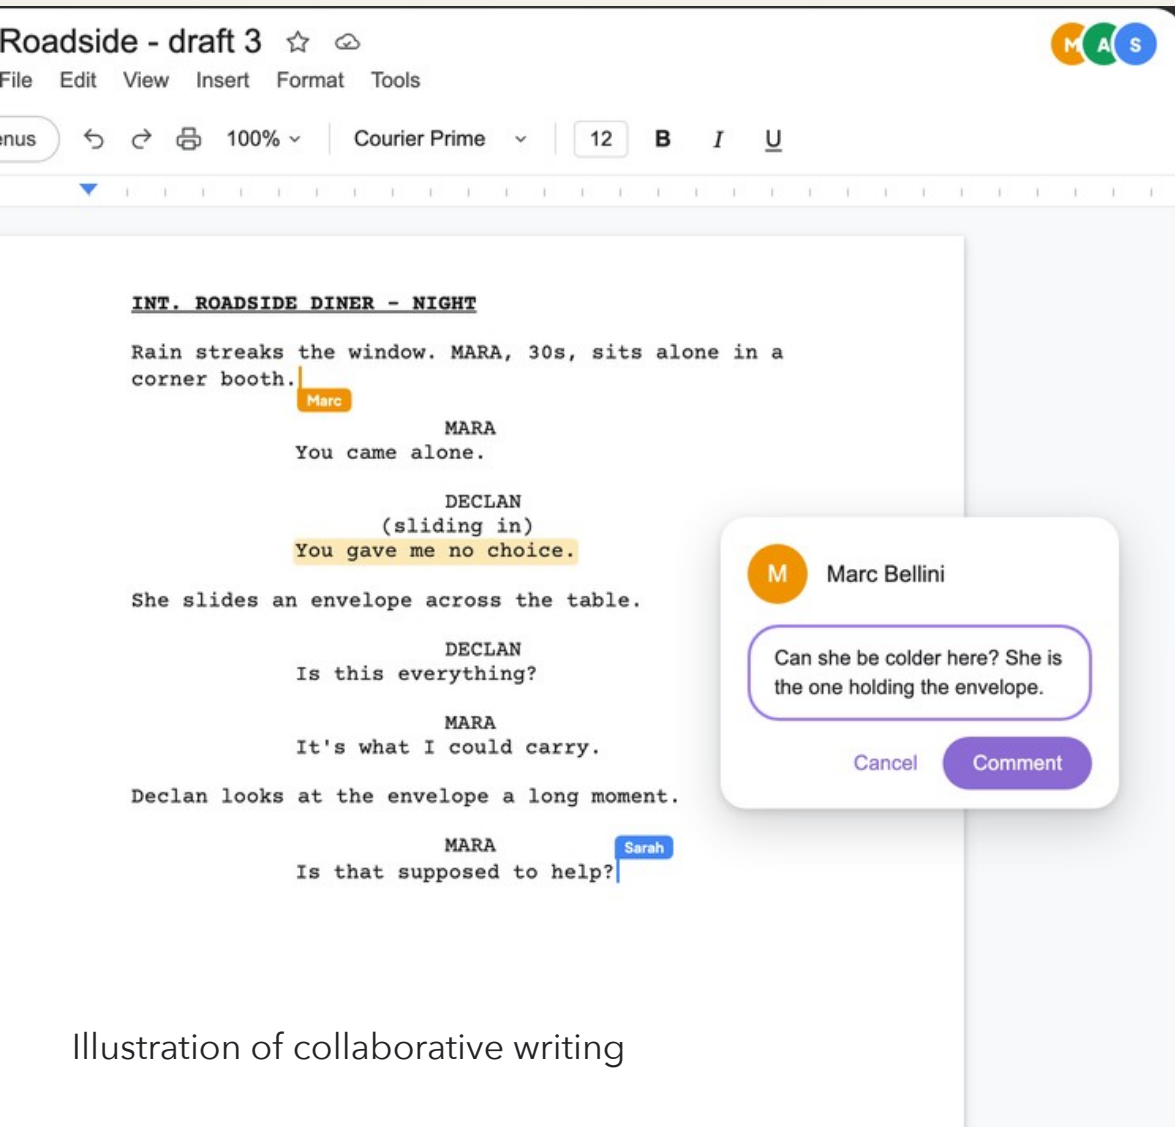

Illustration of collaborative writing

Writers subscribe.

Schools buy a license for their group.

Teachers support their students' projects.
Each new class discovers the software.

"Really easy to use, perfect for the classroom and will definitely be using this with my students."

Marta Lesinski, Google Workspace Marketplace review
September 1, 2026

Brady Guy is preparing a 15-person pilot in the US.

We are growing school sales

~20

institutions in discussion

Hugo will lead an SRN workshop on September 12.

Oxford Brookes University

"What do teachers want from screenwriting software?"

15

contracts targeted by mid-October 2026

US\$18,000 / year

Target: 15 contracts at US\$1,200 per year.

Claude Saliba

Head of Arabic Launch

Screenwriter and film teacher in Lebanon. He is preparing our Arabic-language launch.

We target writers and institutions around the world

Final Draft reports more than

3 million

writers

Screenwriters and writer-directors purchase individual subscriptions.

Celtx reports use in more than

25,000+

educational institutions

This shows the reach of a single provider.

Writers subscribe. Institutions equip their classes.

Sources: adoption figures reported by Final Draft and Celtx, September 2026.

We target far more than film schools

A global education scenario

25,000 institutions
at US\$1,200 per year

US\$30m / year

This scenario covers institutional licences.
Individual subscriptions remain separate.

We target writing programmes

Film schools
Audiovisual colleges and courses
High-school film programmes
Universities and continuing education
Drama schools and acting schools
Conservatoires and writing courses

A contract can grow with its institution

Our US\$1,200 annual quote covers up to 100 students and 3 teachers.

US\$1

per student per month,
when all 100 seats are used.

At the same per-student rate

Student seats

Annual contract

100

US\$1,200

300

US\$3,600

1,000

US\$12,000

A contract can expand across several campuses or schools within the same group.

CIS: accepted quote. Deployments of 300 and 1,000 students illustrate a future pricing model.

We are already developing new AI uses

We are beginning to integrate these features

AI table read

Listen to dialogue and revise a scene.

Poster generation

Give a project in development a visual identity.

AI-assisted scene board

Help structure scenes from the screenplay.

We enter the market through screenwriting and collaboration.

We aim to make AI a major source of growth, with richer offerings as these uses gain acceptance.

We aim to become the workspace where films are prepared

**Every screenplay already contains the characters,
locations and requirements of each scene.**

The screenplay

We are building the software
where writers develop
and revise their scenes.

Preparation

We want to turn that
information into breakdowns,
rehearsal materials
and shoot preparation.

The team

We want script changes
to flow through to
production documents
and the team's work.

We can serve writers, then directors and production teams.

We want to make our head start harder to catch

We know the craft

A screenwriter builds the software he uses.
We keep improving the engine and its reliability.

We develop school licensing

The first agreements open a sales channel.
We want scrrrr to become part of the curriculum, year after year.

We build our distribution

Two stores already distribute the product.
We are adding professional sales partners to turn that reach into customers.

Juniors, a film by Hugo Thomas

**Hugo
Thomas**

I am building this software to write my films

My two feature films,
Willy 1er and Juniors,
have been distributed on Netflix.

Willy 1er, which I co-directed,
was selected for ACID Cannes 2016.

I built the product on my own.

This round builds the team to accelerate our growth

01

Product

The founder brings in developers for focused projects: strengthen the engine and launch Word.

02

Schools

Local sales partners will target film, audiovisual and drama programmes. Hugo will run demos and sell annual institutional licences.

03

Acquisition

We will fund acquisition tests and content to grow trials and subscriptions, then expand the channels that deliver results.

We aim to reach 3,000 paying subscribers in twelve months

The timeline starts when the funding round closes.

AT 3 MONTHS

300 subscribers

School outreach structured

\$2,400 MRR

We test Word with customers and measure the first retention cohorts.

AT 6 MONTHS

1,000 subscribers

School licences in use

\$8,000 MRR

We launch Word commercially and measure how classes use their licences.

AT 12 MONTHS

3,000 subscribers

School retention measured

\$24,000 MRR

We demonstrate six-month retention and a repeatable customer acquisition channel.

Scenario at the \$8 monthly price, without annual discounts. MRR excludes schools.

We are raising

€400,000

**To become a global reference
for professional screenwriting.**

We want involved partners

Software investors and film professionals
to fund and support our expansion.
